

GARDEN SHEDS

Our Garden Shed range is generally used by the domestic customer for the storage of the lawnmower, garden tools and general home storage. The sheds are maintenance free and come standard with a non-drip roof, which prevents drips from the roof in heavy frost or snow.

There is at least one clear panel in the roof, to allow in natural light. All garden sheds come with a 40" wide single door. 6' 10" wide double doors are also available. A wooden floor is a very popular optional extra with all garden sheds.

25mm INSULATED BUILDINGS

Our 25mm Insulated Buildings are a step up from the standard sheds. Insulated buildings are better at keeping out the cold of our Irish winters and the heat of the summer sun.

Insulated buildings have a PVC coated external sheet, and internal white steel sheet with the insulation sandwiched in the centre. 25mm insulated buildings are widely used for storage of vintage cars and tractors. They are also used as utility rooms, hobby rooms or childrens playrooms, ie. an extra room to your house. Gutters and down pipes come as standard as does a 35" (.9m) wide insulated steel door. 5'7" (1.7m) wide double insulated doors are also available.

40mm INSULATED BUILDINGS

Our 40mm Insulated Buildings can be put to a wide range of uses from a fully insulated shed, garage, home office, hobby room, gym, up to the small business or club changing rooms. They are suitable if the building is going to be heated and it is important the frost stays outside. 40mm insulated buildings come standard with an insulated door. Insulated roller doors, French doors, 10 point locking system steel security door or double insulated doors are also available.

WOODGRAIN GARDEN BUILDINGS

Our Woodgrain Cladding Buildings are for those who want their garden shed to have a different appearance to the standard cladding.

The woodgrain gives a very attractive, natural finish to the building which will blend in perfectly into any back garden. Woodgrain cladding is the same prime material as our other buildings but runs horizontal giving a classic wooden look to the building. Woodgrain buildings can also come insulated. An insulated door is standard in all insulated woodgrain buildings.

ASPEN GARDEN BUILDINGS

This style combines the finest architectural features with the functionality that C&S Sheds are known for.

The Aspen range is both practical and stylish in design, made from the same prime PVC coated material as all our other buildings. The shiplap profile gives a very classic wooden look to your garden building. The beautiful pastel colours of moorland green and white will blend comfortably into any back garden.

The Aspen range come standard with a Georgian style PVC door and two opening windows, with white gutters included. The extra height of the 7'1" side walls going up to 8'6" at the apex give the feeling of great space inside.

Aspen Buildings come with two opening windows, PVC door and gutters as standard, with a wide range of uses from home office, hobby room, home gym or garden shed.

Compact Garden Sheds are designed for maximum strength and low maintenance.

They are ideal if the space you have is limited. These sheds are built using exactly the same galvanised steel framing as our larger buildings and maintenance free PVC coated cladding.

The side walls are 6'3" [1.9m] going up to 7'3" [2.2m] at the apex, allowing loads of head room for everyday use. All Compact Garden Sheds come with a non-drip roof to prevent condensation in cold weather, and a roof clearlight providing loads of natural working light.

The door is 40" [1m] for easy access with lawnmowers, wheelbarrows, garden furniture, etc.

Compact Garden Sheds can include a wooden floor which is raised off the ground and has a steel framing under the 18mm OSB flooring.
